

DUST COLLECTOR

MODULAR DUST COLLECTOR

MODULAR DUST COLLECTOR

A modular dust collector is a dust extraction system made up of multiple smaller, standardized units (modules) that work together. These modules can be combined or separated to customize the dust collection capacity and configuration according to the specific needs of a facility.

SPECIAL FEATURES:

- ✓ **Modular Construction:** Composed of repeatable units that can be connected or disconnected easily.
- ✓ **Scalability:** Capacity can be increased or decreased by adding or removing modules.
- ✓ **Space Optimization:** Modules can be arranged to fit constrained or irregular spaces.
- ✓ **Low Downtime:** Individual modules can be serviced without shutting down the entire system.

SPECIFICATIONS:

Models	UVDC - DW(30w4-150w12)	Dimension (mm)	Customized
Power (hp)	3 - 150	Noise Level (db)	72 - 84
Voltage	415 V & 50 Hz	Collection Capacity (lit)	40 - 100
Air Flow (m3/hr)	6800 - 12000	Filter Type	Cartridge Filter
Suction (mm of WG)	75 - 300	Filter Cleaning Method	Reverse Pulsjet
Weight (kg)	150 - 310		

APPLICATIONS:

- ✓ Battery Manufacturing
- ✓ Fertilizer Blending & Packing Industries
- ✓ Pharmaceutical Industries
- ✓ Tire Manufacturing Industries
- ✓ Pulp & Paper Manufacturing Industries
- ✓ Ceramics & Glass Manufacturing Industries
- ✓ Powder Coating Industries
